We are very satisfied and have received many good comments about the gentleness and the production from the bees I am hauling from Gardner Apiaries - Spell Bee Company of Baxley Georgia.

Listed are several reasons you may want to try them.

- * These bees are certified African free
- * These bees are gentle and are great honey producers
- * They are on the cutting edge of new technology to combat CCD and other diseases

Please Note: We would appreciate it if you would contact us if you no longer have or plan to have bees in the future. We need to revise our mailing list. Thank You Dale
